HANDLING AND CARE

VONDOM covers are impregnated to resist water, oil and dirt, functioning to protect the furniture. They are not recommended as a permanent cover for cushions, as moisture may collect and lead to the formation of mold stains. Furniture and cushions should be thoroughly dry before using the covers. Please note that the covers are especially tailored to your furniture item and precise placement is required. In order to increase the circulation of air and avoid the formation of condensation, the covers are not made to floor length. Never pack or fold covers that have become wet; instead, let them dry in a well-ventilated place. Use a soft cloth and warm water to clean the covers, using a gentle upholstery cleaner if necessary. Rinse with clear water. Solvents are not suitable for cleaning the covers as these are aggressive to the surface and may cause damage and discoloration.

Las fundas Vondom son impermeables y repelen el agua, el aceite y la suciedad y sirven para proteger el mueble. Pero no sirven para cubrir los cojines de forma permanente porque se puede formar humedad junto a las costuras de la funda y dejar manchas de moho en la tela. Antes de utilizar las fundas, el mueble y los cojines han de estar secos. Tenga en cuenta que las fundas están adaptadas especialmente a sus muebles y es necesario colocarlas correctamente. Para aumentar la circulación de aire, las fundas no llegan al suelo. No guardar o doblar las fundas húmedas, dejar que se sequen en un lugar con buena ventilación. Para limpiar las fundas utilice un paño suave, agua caliente y un producto de limpieza suave si es necesario. Despues lávelas con agua. INSTRUCCIONS_ Planting Instructions

- Set a fine layer of about 2 or 3 cm. in deep of expanded clay on the base of the self-watering base.
- Add the vegetal soil for plants in the flowerpot, leaving space for the root ball of the plant.
- Planting the plant in the flowerpot, previously aerating the roots in order to favour its growth. Finish filling the flowerpot with vegetal soil & press down on the soil with your hands to make it perfectly compact.
- Water the plant on the soil. In the following weeks, please water the plant over the top as the roots of the plant have not reached the platform layer of the self-watering apparatus yet, where the water tank is stored.

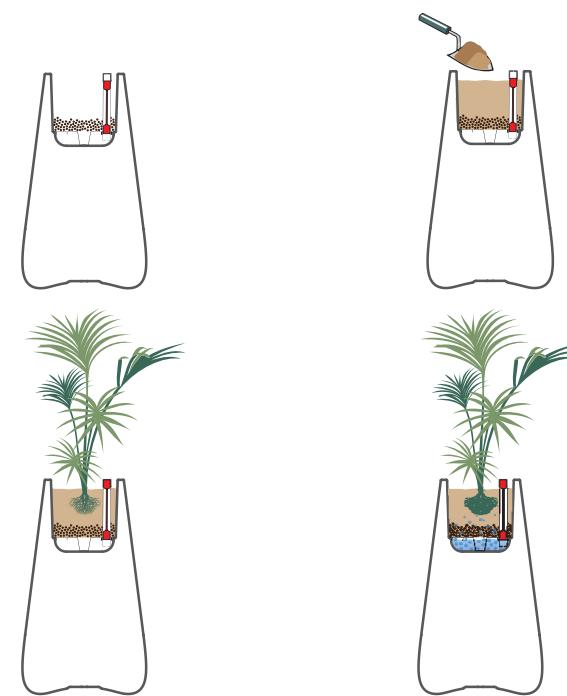

INSTRUCCIONES_ Descripción del producto.

- 1.- Indicador de nivel de agua del depósito, comprobable en todo momento.
- 2.- Arcilla expandida, actúa como drenaje. Evita el estancamiento, dosifica el transporte del agua y garantiza la aireación de las raíces.
- 3.- Tierra vegetal.
- 4.- Base de autoriego donde la planta absorbe el agua.
- 5.- Depósito de agua.
- 6.- Opción de ruedas o patas.

INSTRUCCIONES_ Instrucciones de plantado

- Ponga una capa fina de arcilla expandida de unos 2 ó 3 cm. de grosor sobre la base del autoriego.
- Añada la tierra vegetal para plantas a la maceta, procurando dejar un hueco para el cepellón de la planta que quiera plantar.
- Plante la planta en la maceta aireando previamente las raíces para favorecer su crecimiento. Acabe de rellenar con tierra vegetal la maceta y presione bien la tierra con las manos para una perfecta compactación.
- Riegue la planta sobre la tierra. En las próximas semanas tendrá que regar por encima, ya que las raíces de la planta no han llegado hasta la capa de la plataforma del autoriego, donde se encuentra el depósito del agua.

RECOMMENDATIONS

After this period of adaption for the roots, fill the water tank until the top very slowly until the indicator reaches the maximum level. If there is no water, the indicator will be at the minimum level, check the indicator level regularly. The period of watering depends on the flowerpot size, plant type and its location. Consult it with a professional in the sector.

INDOOR (Light and Led finishes)

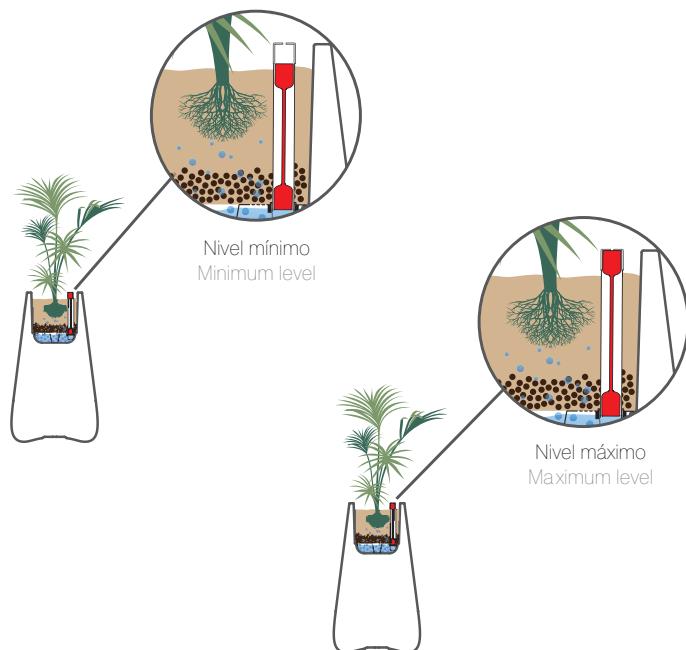

For indoor use, need to check if the stopper of drainage is placed before planting the plant.

OUTDOOR

For outdoor use, please take off the stopper of drainage (Light and Led finishes) and drill the holes at the indicated mark, bearing in mind the position of the water tank (Basic, Self-Watering and Lacquered) and also in the base of the flower pot, so that if it rains, the water overflow will evacuate and not harm the plant.

If you cover the soil with a fine layer of stones, it will stop the moisture from evaporating and improve its aesthetic appearance. For fertilizing and better care of your plants, consult your gardener or your garden centre. VONDOM, accepts no responsibility for any damage done to the plants caused by the incorrect use of flowerpots.

RECOMENDACIONES

Después de este período de adaptación de las raíces, llene el depósito de la reserva del agua al máximo, muy lentamente hasta que el indicador del agua suba hasta su nivel máximo. Si no hay agua el indicador estará al mínimo. Compruebe periódicamente el nivel del indicador del agua. El período de regado depende según el tamaño de maceta, tipo de planta y de su ubicación. Consultelo con un profesional del sector.

INTERIOR (acabados Luz, Led RGB)

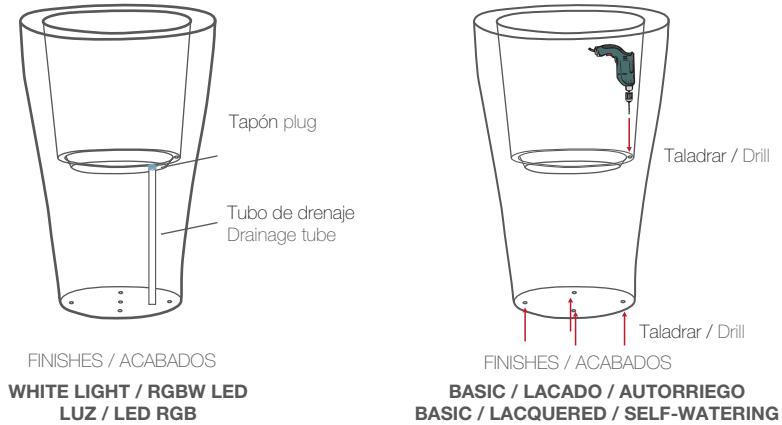

Para uso interior se tiene que comprobar que el tapón del drenaje esté colocado antes de plantar la planta.

EXTERIOR

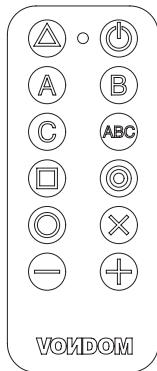

Para uso en el exterior se tiene que sacar el tapón del drenaje (acabados Luz, Led RGB) y taladrar los puntos de precorche respetando la reserva del agua (acabados Basic, Lacado y Autorriego) y en la base de la maceta, ya que si llueve el agua sobrante podrá evacuar y no dañará la planta.

Si cubre la tierra con una capa de piedras de jardinería, evitará que se evapore la humedad y mejorará su aspecto estético. Para el abonado y un mejor cuidado de sus plantas, consulte en su tienda especializada o a un profesional del sector. VONDOM, no se hace responsable de cualquier daño ocurrido en la planta debido a un mal uso de sus macetas.
